1 滾鍍設備：

- 適用於一般的電子零件，小型螺絲及金屬零件的電鍍。
- 鍍金流程，可依現場需求隨時變化程式，更改容易，亦可同時設定多種程式達到其經濟價值。

ROLLING TYPE PLATING EQUIPMENT

- It is most suitable for electronic components, smaller fasteners and metal terminals.
- The feature of this design is the plating flow line can be easily changed. The change of a program can be easily made according to the actual site. Then a better program can be design for achieving high quality plating. For attaining higher profit.

2

微電腦控制系統：

- 生產省力化、自動化，提昇品質，降低人力。
- 電鍍專用，穩定性高，操作簡便，故障率低。
- 電鍍時間精確，保護功能齊全，維修容易。

MICROCOMPUTER CONTROL SYSTEM

- For automating, saving labor, improving work quality and reducing cost.
- Specially designed for plating, high stability, easy operation and less failure.
- Accurate plating time, complete protection and easy service.

新型PP槽

跟隨科技日新月異的發展前提下，各項工業也突飛猛進爲了提供更佳的技术品質來突破傳統，本公司因應時代潮流需求，讓品質與科技結合，提昇其經濟效率，特引進德國WEGENER焊折機與技術及SIMONA之PP板，爲現代電鍍設備提供了更多的改善，更多的服務。

SIMONA PP板，在德國原廠經過數種的試驗，包括了密度及溫度，變型係數，膨脹係數，凹痕沖擊及拉力強度等多項試驗，均證明較他國製造的PP板更經得起考驗。

因此採用德國原廠生產之進口PP板，不僅外型美觀之外，其本身亦有長期耐腐蝕的特性，亦是目前電鍍業者最大的福音。

NEW PP TANK

UNDER THE DEVELOPMENT OF CHANGING TECHNOLOGY, EVERY KIND OF INDUSTRY HAS BEEN GROWING RAPIDLY. TO OFFER TECHNICAL TECHNOLOGY AND QUALITY IN ORDER TO BREAK THROUGH THE TRADITION, OUR COMPANY FOLLOW THE CURRENT TENDENCY, COMBINE QUALITY WITH TECHNOLOGY, AND PROMOTE THE ECONOMIC EFFICIENCY BY ADOPTING THE GERMAN WEGENER SOLDERING/FOLDING MACHINE AND TECHNIQUE AS WELL AS THE SIMONA PP PLATE, HOPING TO OFFER MORE SERVICE AND IMPROVEMENT ON THE MODERN PLATING EQUIPMENT.

THE SIMONA PP PLATE HAS UNDERGONE SEVERAL TESTS IN THE GERMAN FACTORY, INCLUDING THE TESTS OF DENSITY, TEMPERATURE, DEFORMATION COEFFICIENT, EXPANSION COEFFICIENT, NOTCH STROKE AND TENSILE STRENGTH, ETC. ALL PROVE THAT IT IS MORE DURABLE THAN ANY PP PLATE FROM OTHER COUNTRIES.

THEREFORE, THE USE OF PP PLATE IMPORTED FROM AND MADE BY THE GERMAN FACTORY IS A GREAT BLESSING FOR THE MODERN PLATING BUSINESS, SINCE IT HAS BEAUTIFUL APPEARANCE AND ALSO THE LONG-TIME CORROSION RESISTANCE.

新型專利第五五〇五號

PP滾桶、零件系列：

- PP射出成型，組合式，高強度耐蝕，耐溫不變形，高導電率。
- 承受力量強，是本公司新型產品，並有十年專利。

PP ROLLER PART SERIES

- PP injection molding, assembling type, high strength, corrosion resisting, heat resisting, being distortionless, high conduction rate and high supporting force. This is a newly developed item. We are patented it for 10 years.
